Data Visualization III

Download the Iris flower dataset or any other dataset into a DataFrame. (e.g.,

https://archive.ics.uci.edu/ml/datasets/Iris). Scan the dataset and give the inference as:

- 1. List down the features and their types (e.g., numeric, nominal) available in the dataset.
- 2. Create a histogram for each feature in the dataset to illustrate the feature distributions.
- 3. Create a boxplot for each feature in the dataset.
- 4. Compare distributions and identify outliers

import numpy as np import pandas as pd

df = pd.read_csv("Iris.csv")
df.head()

	ld	SepalLength	ıCm	SepalWidthCm	PetalLengthCm		PetalWidthCm
	Speci	ies					
0	1	5.1	3.5	1.4	0.2	Iris-setosa	
1	2	4.9	3.0	1.4	0.2	Iris-setosa	
2	3	4.7	3.2	1.3	0.2	Iris-setosa	
3	4	4.6	3.1	1.5	0.2	Iris-setosa	
4	5	5.0	3.6	1.4	0.2	Iris-setosa	

column = len(list(df))
